ABOUT ME

Software Engineering graduate focused on AI and data . Experienced in building projects in software development and AI. I enjoy solving complex problems and turning data into actionable insights.

EDUCATION

Engineering Cycle in Software Engineering and Information Systems

Higher institute of Computing and Multimedia of Gabes (ISIMG) . 2023 - 2026 . Graduated Sep 2026

Integrated Preparatory Cycle - ISIMG . 2021 - 2023

Baccalaureate in Mathematics - Gafsa Pioneer High School . 2021

EXPERIENCES

- **AI-Powered Sales Automation in Odoo — Python, Odoo 19, LLMs (BID Consulting, Feb - Aug 2026)**

  Built two Odoo 19 modules that read order and supplier-invoice emails with LLMs and turn them into draft quotations and vendor bills, with human review where mistakes are costly. Both are deployed at the company. Benchmarked three models per task in MLflow; the invoice model reached 97.1% field accuracy.

- **Intern management Platform — Django, HTML, CSS, JS, Bootstrap (CPG, August 2025)**

  Developed an internship management system with Django, enabling users to create profiles, upload CVs and apply for offers. Implemented secure authentication, role-based access control, an admin approval workflow, interview scheduling, email notifications and a KPI dashboard.

- **Secure Image Upload System — Laravel, PHP, MySQL, Encryption (CPG, June 2024)**

  Developed a secure web app for uploading and viewing encrypted images with user authentication. Every image is stored encrypted with AES-256 or one of seven classical ciphers, and decrypted only for its owner

PROJECTS

- **Road Accident Risk Prediction (Kaggle) - Top 12 %**

  Predicted the accident risk of road segments from tabular data, comparing XGBoost with hand-crafted interaction features against an AutoGluon ensemble of LightGBM, CatBoost and XGBoost.

- **Tactical Features from Soccer Tracking Data**

  Engineered 50 tactical features from SkillCorner data for 10 A-League matches, covering pressing, transitions and passing risk; tested 47 hypotheses and kept 17 feature groups.

- **Student Misconception Prediction**

  Predicts student misconceptions from question-answer pairs with Transformer embeddings and a custom neural network.

- **AI-Powered Recruitment Assistant**

  Built an AI agent system that automates the first steps of hiring: it fetches CVs from the email inbox, extracts each candidate's profile, scores it against the role, makes an accept or reject decision and sends an automated reply.

SKILLS

Programming & Development: Python, PHP, HTML/CSS/JS, SQL , Laravel, Odoo

AI & Machine Learning: Machine Learning, Deep Learning, Transformers, LLMs, RAG, Scikit-learn, TensorFlow, LLM Evaluation, Prompt Engineering

Data & Analytics: Data Cleaning, Feature Engineering , EDA , Data Visualization, Data Mining, Pandas, NumPy, Matplotlib, Seaborn

Tools & Platforms: Git, GitHub, Kaggle, Google Colab, VS Code, PostgreSQL, MLflow

Soft Skills : Problem-solving , Adaptability , Stress & time management

LANGUAGES

Arabic — Native | **French** — Fluent | **English** — Fluent

CERTIFICATIONS

Scrum Fundamental Certified – SCRUMstudy

Python 101 for Data Science – IBM / Cognitive Class

Pandas — Kaggle Learn
